Learning

# Welcome to mre, an extracurricular learning centre!

What does 'abstract' actually mean? And does it take courage to enjoy art? Learn and explore creatively with a visit to the mre! Our museum educators guide your class through the art and architecture with the compelling, interactive activities of our *Experience Abstraction* format.

Get to know this unique museum from a colorful, interdisciplinary perspective, while integrating core curriculum elements and developing creative problem-solving skills. Our 90-minute program is **free** for schools and can include a visit to our in-house digital color lab.
